

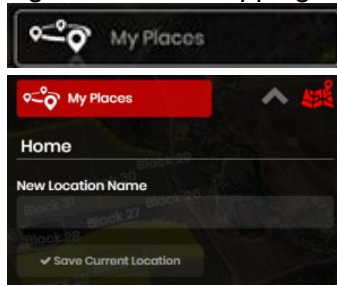

# Mapping

HELPFUL HINTS

# MY PLACES

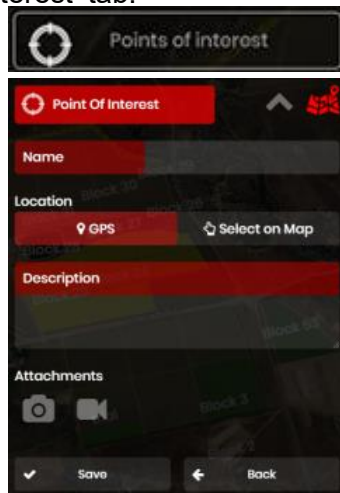

To add to 'My places,' start by clicking on the red 'Mapping' tab at the bottom of your screen and select the 'My Places' tab.

- 1) Once you click on the 'My Places' tab add your name to the 'New Location Name' section.
- 2) After typing in your new location name click the 'Save Current Location.'

# POINT OF INTEREST

To add a 'Point of Interest,' start by clicking on the red 'Mapping' tab at the bottom of your screen and click on the 'Point of Interest' tab.

- 1) Add a name to the point of interest you want to add.
- 2) Click to add the point of interest via 'GPS' or 'Select on Map.'
- 3) Add a description to your point of interest.
- 4) You also have the option to add an 'Image' or 'Video.'

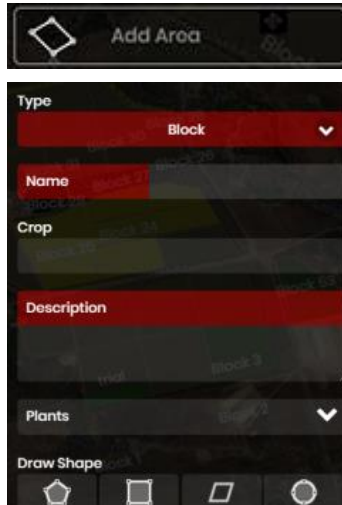

- 5) Once all the sections have been filled out click 'Save' and a point of interest will be added.

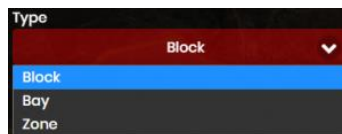

# ADD AREA

To 'Add an Area,' start by clicking on the red 'Mapping' tab at the bottom of your screen and click on the 'Add Area' tab.

1) Choose a 'Block Type' for your area.

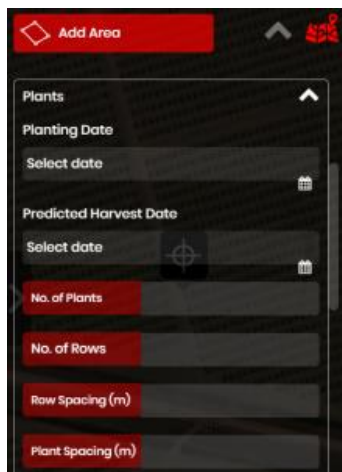

2) Add a name for the area being added.

3) Type or select the crop you are adding.

4) Add a description if you choose to.

5) Fill out the plant information for your crop.

6) Add the shape of the area you are adding to your farm, choose the font size, colour, and label rotation.

7) Once you have filled out all the information to add an area click 'Save.'

# FARM OBJECTS

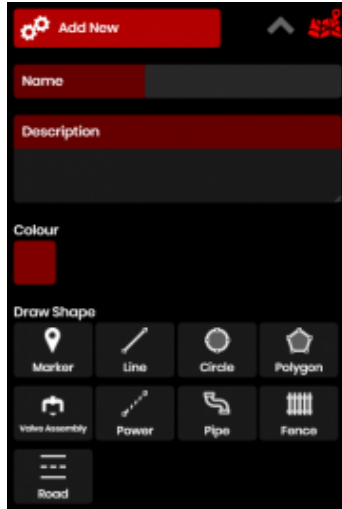

To add 'Farm Objects' such as power lines, roads, fences, valves, etc, start by clicking on the red 'Mapping' tab at the bottom of your screen and click on the 'Farm Objects' tab.

1)Click 'Farm Objects' and here you can see all of the previously created farm objects, which you can view, edit and delete by selecting from the icons, or click the add 'Farm Objects' button.

2)Add your 'Name,' 'Description,' and 'Colour' of your Object.

3)Select from the various object options under 'Draw Shape' and map them on your farm.

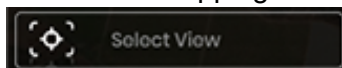

4)Once all the information is filled out click 'Save' you can also add as many farm objects as needed.

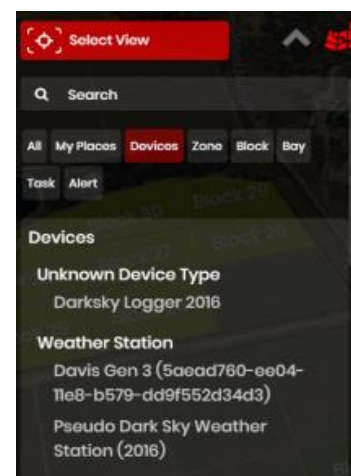

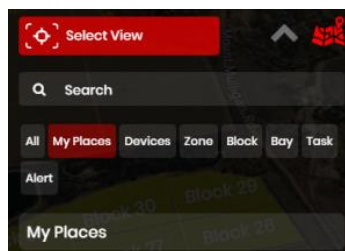

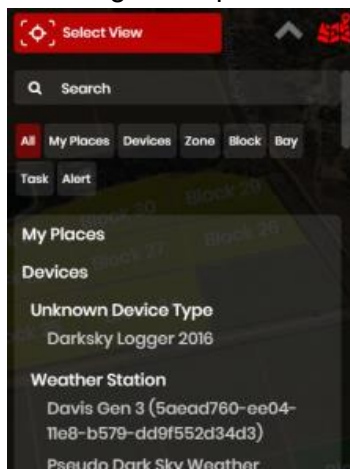

# SELECT VIEW

To 'Select a View,' start by clicking on the red 'Mapping' tab at the bottom of your screen and click on the 'Select View' tab.

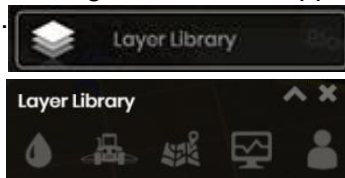

1)Click through the options available in the 'Select View' section.

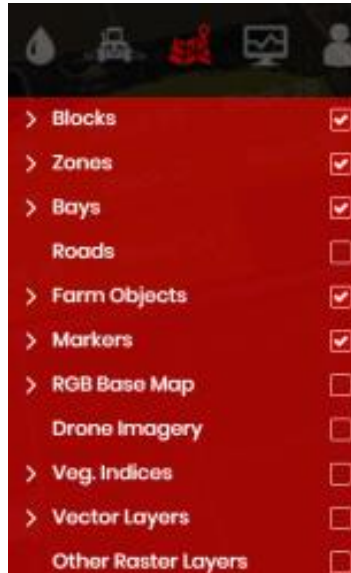

# LAYER LIBRARY

To see the 'Layer Library,' start by clicking on the red 'Mapping' tab at the bottom of your screen and click on the 'Layer Library' tab.

1) Click through each of the icons to choose what you want to view in the layer library.

2) Click on the box next to the world icon to tick all the boxes in the layer library.

# IMAGERY

To add 'Imagery,' start by clicking on the red 'Mapping' tab at the bottom of your screen and select the 'Imagery' tab.

1) Click the 'Add Drone Imagery' button to fill out the information.

2) Start by adding your name and a description of the drone imagery being added.

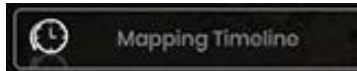

- 3) Choose between 'Mercator' or 'Geodetic' for the 'Output Projection.'
- 4) Choose between 'Raster 2D Tiles' or '3D Cesium Terrains' for the output format.
- 5) Set the minimum and maximum zoom levels.
- 6) Click 'Add GeoTIFF file.'
- 7) Once all the sections have been filled out click 'Save' to add your imagery to your farm.

# MAPPING TIMELINE

To add a 'Timeline,' start by clicking on the red 'Mapping' tab at the bottom of your screen and select the 'Mapping Timeline' tab.

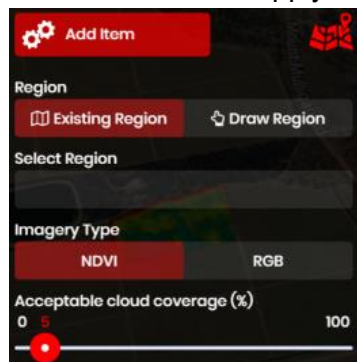

- 1) Click on the icons on the top right of the mapping timeline to add items to your timeline.

- 2) Click 'Compare Dates' to compare mapping tasks that were done on certain days.

- 3) Add new items by clicking the 'Add' icon then click 'Apply.'

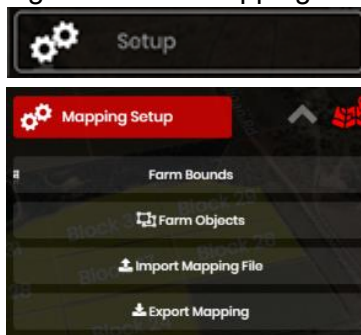

- 4) Click the 'Legend' icon to show the high and low density.

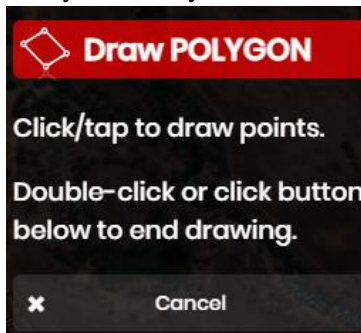

# SETUP

To 'Setup' your farm, start by clicking on the red 'Mapping' tab at the bottom of your screen and select the 'Setup' tab.

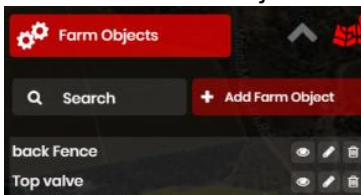

1) Click on the 'Farm Bounds' button then click 'Add Farm Bounds.'

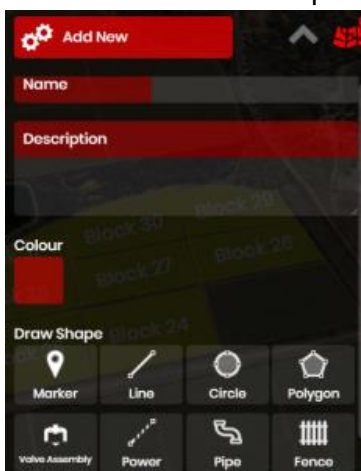

2) Then click on the map to add where you want your farm bounds to be.

3) Click on the 'Farm Objects' then click 'Add Farm Objects' to add to your farm.

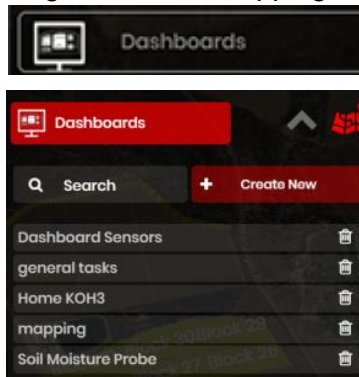

4) Once you click to add farm objects a screen will come up with detailed options to add objects to your farm display.

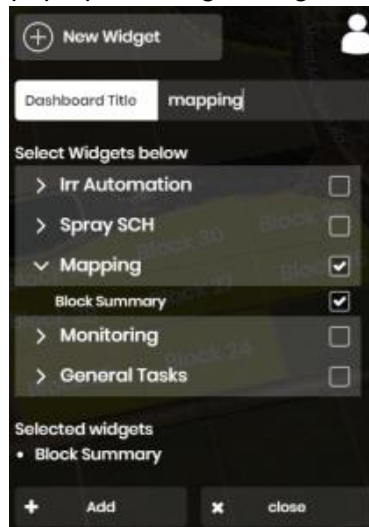

5) Once you have added all the farm objects you can choose to 'Import' and 'Export' mapping files.

# DASHBOARDS

To add a 'Dashboard,' start by clicking on the red 'Mapping' tab at the bottom of your screen and select the 'Dashboard' tab.

- 1) Click 'Create New' to add new information to your dashboard.
- 2) Add a title to your dashboard and select the widgets you want to add.
- 3) Click the 'Add' button once you have selected the widgets you want to be displayed.
- 4) The dashboard screen will then pop up showing a widget display of what you have selected to be shown.
