HELPFUL HINTS

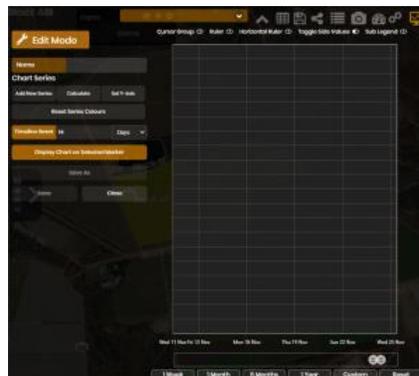

CHARTS

To add 'Charts,' start by clicking on the yellow 'Monitoring' tab at the bottom of your screen and select the 'Charts' tab.

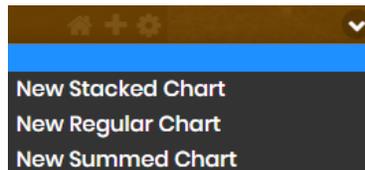

1) Click the 'Create Chart' button to start making a chart.

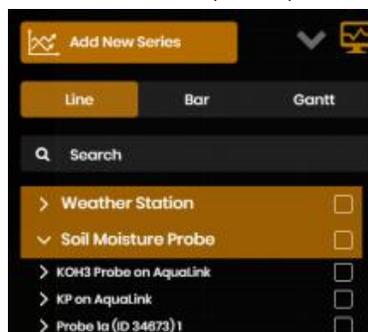

2) A chart will then show up on the screen with the editing mode to 'Name,' 'Add a New Series,' 'Calculate,' 'Set Y-Axis,' 'Reset Series Colours,' 'Timeline Reset,' 'Display Chart on Selected Makers,' and to 'Save.'

3) After you fill out the section on the left-hand side click the arrow in the tab next to the icons on the top right and select a new chart.

4) Click the 'Add New Series' button to add a 'Line,' 'Bar,' or 'Gantt,' chart to the graph.

5) Once you have selected what you want to be shown on the graph click the 'Add Selected Devices to Graph' button.

6)The new series that you have chosen will then appear in the chart as either a line, bar, or Gantt chart.

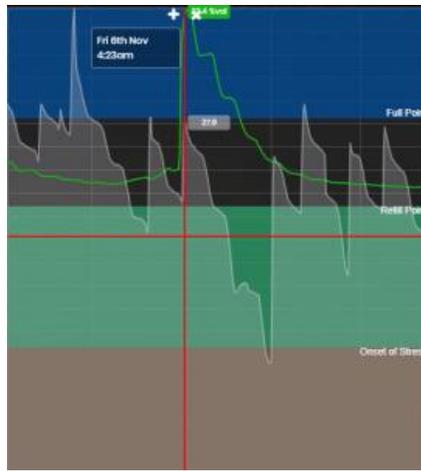

7)You can click on the box next to the chart name to change the colours of the chart series.

8)You can also click the trash can icon on the right of the chart name if you do not want one of the selected sensors on the chart.

9)You can also move the bar on the bottom of the graph to show different dates or lengthen the amount shown on the chart.

10)There is also an option to turn on the ruler for vertical and horizontal in-depth information.

11)When editing mode is off you can click on the 'Sub Legend' button to turn on the legend of all the sensors on the chart.

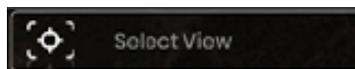

12)To show the Gauge click on the plus icon on the right side of the chart to see more in-depth information.

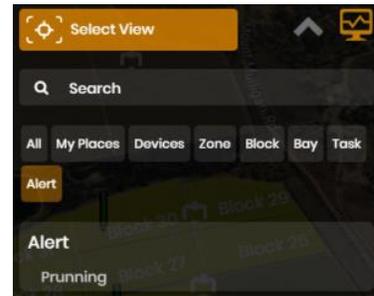

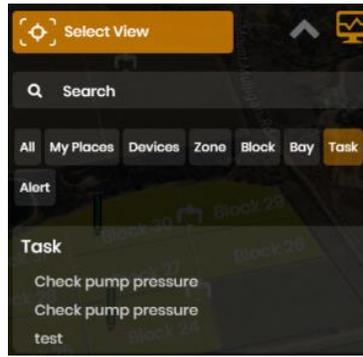

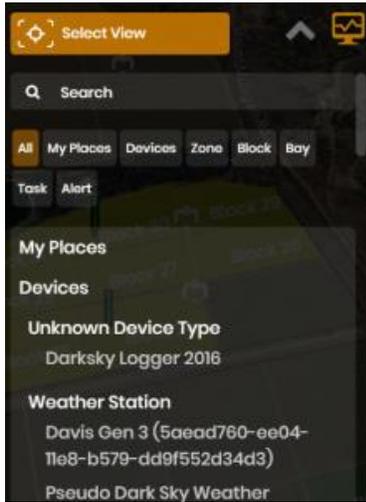

13)The charts icon bar at the top right of the screen when you click on each icon it will display more information or give the option to add information to get a more accurate reading for your charts.

SELECT VIEW

To 'Select View,' start by clicking on the yellow 'Monitoring' tab at the bottom of your screen and click on the 'Select View' tab.

1)Click through the select view options.

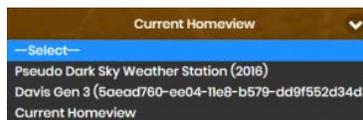

WEATHER DASHBOARD

To add a 'Weather Dashboard,' start by clicking on the yellow 'Monitoring' tab at the bottom of your screen and click on the 'Weather Dashboard' tab.

1)When you click on the weather dashboard tab the dashboard will pop up.

2)Click the arrow next to the 'Current Homeview' and choose to display different dashboards.

3)To add a new item click the 'Add Item' square in the dashboard.

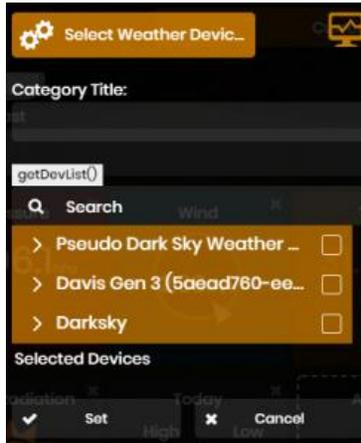

4)Scroll down the dashboard with the bar on the right to view the temperature for the next 7 days or click 'Switch to Forecast' to see the weather for the next 7 days.

5) To reorganise the dashboard display click and hold on the widget you want to move and drag to where you want it to be displayed on the dashboard.

6) To add a category, scroll to the bottom of the dashboard and click 'Add Category.'

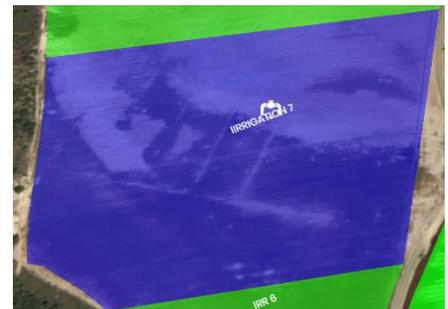

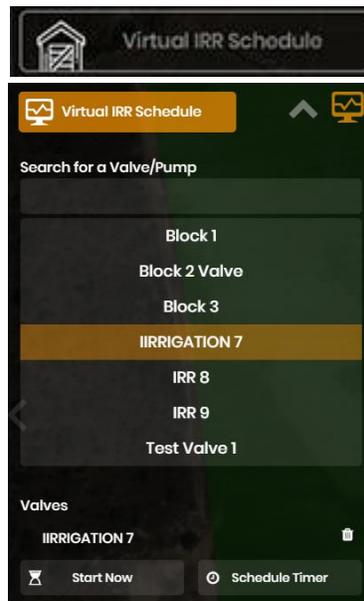

7) After you click 'Add Category' the 'Select Weather Device' information will pop up; from there you can choose what devices you want to be added or choose another forecast.

8) After selecting what devices to add click 'Save' and the new category will be added.

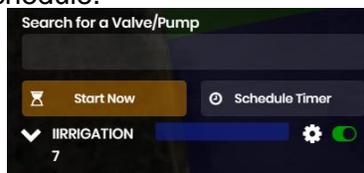

VIRTUAL IRRIGATION SCHEDULE

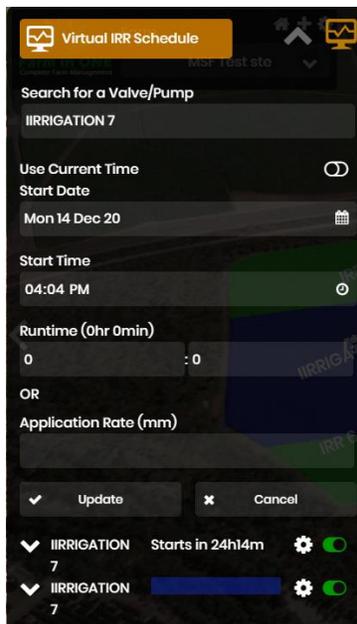

To add a 'Virtual Irrigation Schedule,' start by clicking on the yellow 'Monitoring' tab at the bottom of your screen and select the 'Virtual IRR Schedule' tab. (In order to set a virtual irrigation schedule, you need to add the valve/pump to the devices section first.)

1) Search for the valve/pump you want the irrigation to run on.

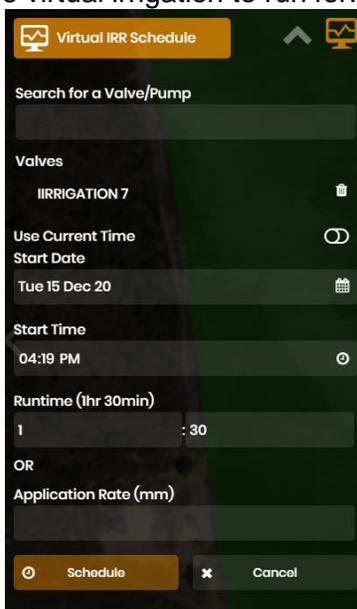

2) Click start now and the irrigation will run automatically, you can also click on the timetable tab and it will show your irrigation that is currently running. The cog icon gives you the option to edit/update the virtual irrigation schedule.

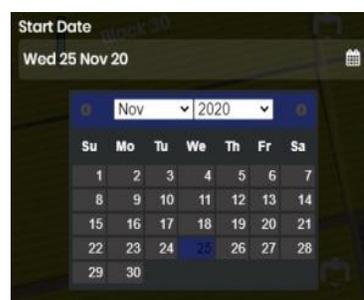

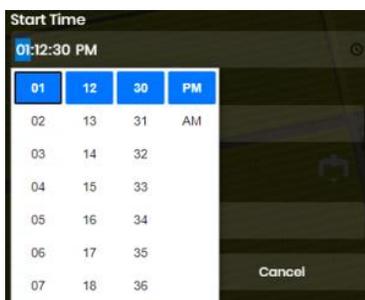

3) You have the option to schedule a virtual irrigation schedule if you do not want it to run instantly.

4) Select the valve/pump to run, set the date and time you want to schedule the irrigation for, and add the length of time you want the virtual irrigation to run for.

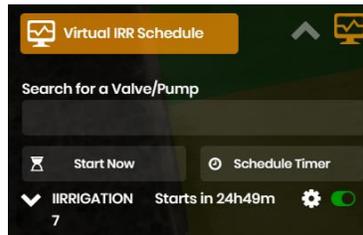

4) Click the 'Calendar' icon to set a date for the schedule and click the 'Clock' icon to set a time for the schedule.

5)After selecting the date and time, choose to either add a 'Runtime or 'Application Rate' for the virtual irrigation schedule.

6)Once all the information is filled out click the 'Schedule' button.

7)A countdown time will then show in the virtual irrigation schedule to show how long till it runs you can also click on the cog icon and you can edit the date or time for the schedule.

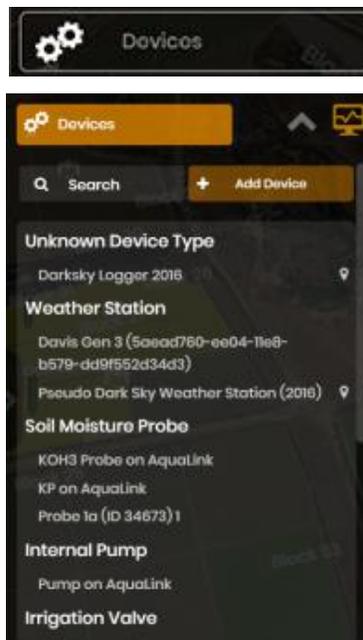

8)If you chose to set a scheduled time you can click on the timetable to view the irrigation scheduled.

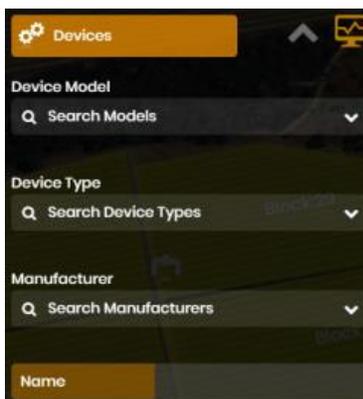

DEVICES

To see or add 'Device,' start by clicking the yellow 'Monitoring' tab at the bottom of your screen and select the 'Devices' tab.

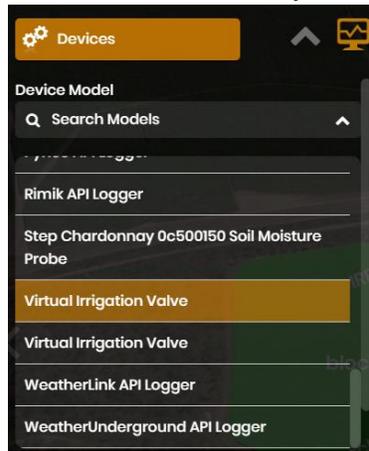

1)Click the 'Add Device' to add a device.

2)A devices box will appear and here you can search for a 'Device Model,' 'Device Type,' and the 'Manufacturer.'

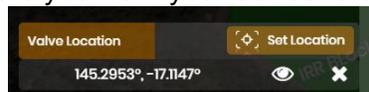

3)Click the device to add in the search models section by clicking the arrow.

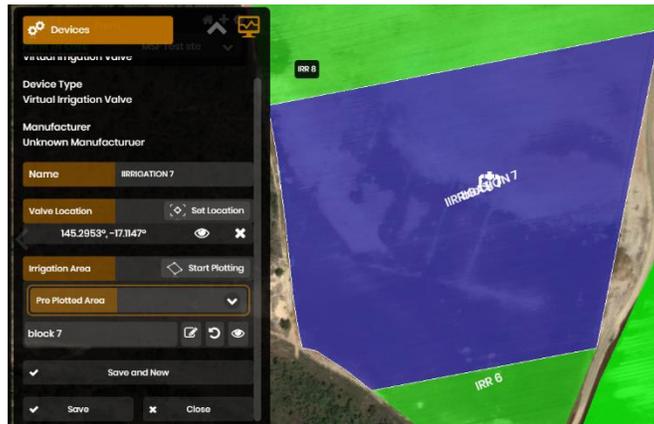

4)Add a name for your device.

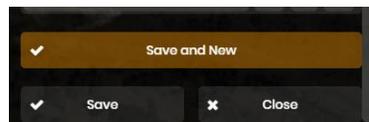

5)Click on the map to choose where you want your device to sit on the map.

6)Select the pre-plotted area to add your device to.

7)Click save and new to add the device to the map and add a second device or click save to add just the one device.

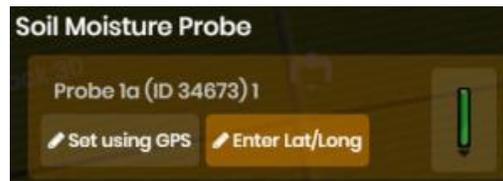

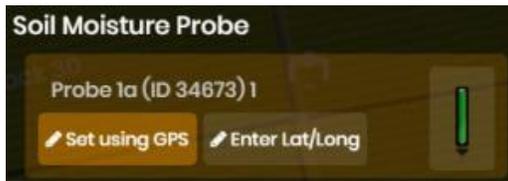

ALLOCATE DEVICES

To 'Allocate Devices,' start by clicking on the yellow 'Monitoring' tab at the bottom of the screen and select the 'Allocate Devices' tab.

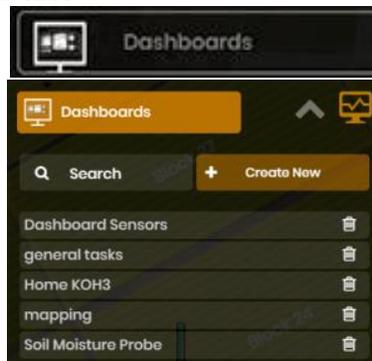

1) Allocate a device either by 'GPS' or by entering the 'Latitude/Longitude.'

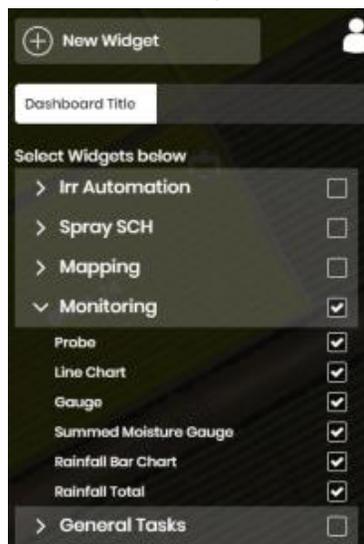

DASHBOARDS

To add a 'Dashboard,' start by clicking on the yellow 'Monitoring' tab at the bottom of your screen and select the 'Dashboard' tab.

1) Click 'Create New' to add new information to your dashboard.

2) Add a title to your dashboard and select the widgets you want to add.

3) Click the 'Add' button once you have selected the widgets you want to be displayed.

4) The dashboard screen will then pop up showing a widget display of what you have selected to be shown.
